## THE STREAMLINED DRILLING REPORT

Several changes are evident in this number of the drilling report. Features have been dropped, combined, or presented in an altered form. Reducing the bulk of the report by omitting items of little general interest will make the other features more readily available. The tables "Drilling in the New Pools", "Refined Petroleum Products Stocks", and the list of dry holes plugged are eliminated, but the list of producing wells plugged is retained, for it has proved helpful to many subscribers.

Dropping the distinction between production in the "New Fields" discovered after January 1, 1937, and the "Old Fields" of the first major oil development in Illinois allows us to consolidate the former tables "Well Completions in Illinois" and "Illinois Completions and Production" into the single table presented on page 7. The summary of drilling by counties is given, essentially unchanged, on pages 5 and 6, its former position on this page being taken by the list of discoveries, changes in pool status, and news items. In the body of the report only completions are now listed, because the inclusion of incompleated wildcat tests extended the listing without conferring any real advantage. The reworked old wells are now included in the main list.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2 N., R. 1-3 W.).

Maps 20, 21, 22, and 23 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential

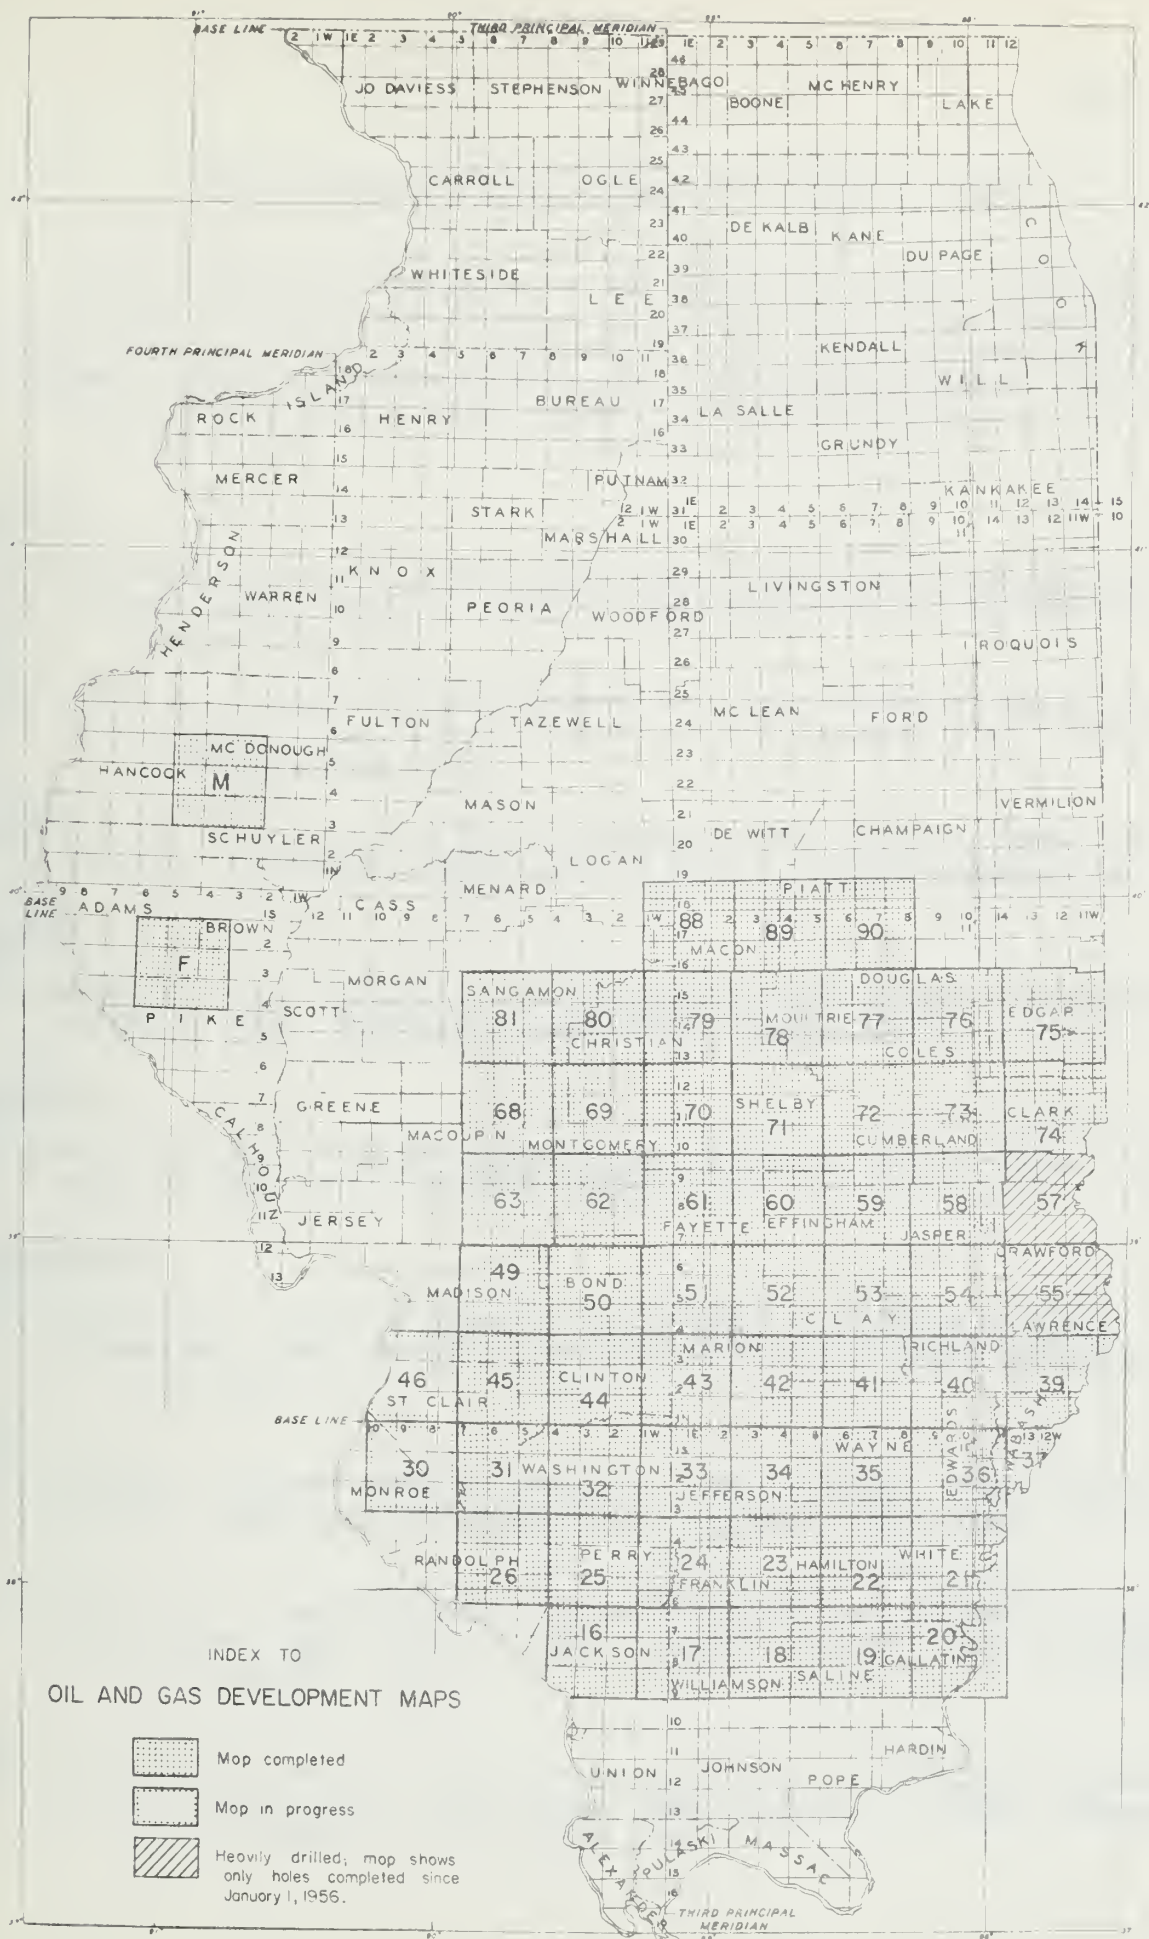

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

## OTHER OIL AND GAS MAPS

Map of the Oil and Gas Industry in Illinois. January 1, 1955. Scale approximately 8 miles to the inch. Shows location of oil and gas fields, pipelines, pumping stations and refineries. Available rolled (35¢) or included in Ill. Pet. 74, which includes alphabetical list of oil and gas pools and brief text (35¢). Map is presently being revised but is still available as above.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

INDEX TO  
OIL AND GAS DEVELOPMENT MAPS

-  Map completed
-  Map in progress
-  Heavily drilled, map shows only holes completed since January 1, 1956.

## WELLS COMPLETED BETWEEN MARCH 2 AND MARCH 29, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage, or structure testing.

No new oil or gas pools, extensions to pools, or new producing strata in pools were discovered in April.

Good oil wells continue to be completed in Secs. 20 and 29, T. 4 S., R. 10 E., about three miles west of Crossville, White County. Five oil wells were reported completed in this area in April, with initial potentials of from 110 to 785 barrels of oil a day. Four of the wells are from Ohara Limestone and one from Cypress Sandstone. The Ohara wells were acidized, and the Cypress well was given fracture treatment. During the first quarter 1961, eleven wells were completed in this area, with initial production figures averaging 450 barrels of oil a day. All 11 wells were completed in the Ohara Limestone.

In Sec. 12, T. 5 S., R. 9 E., just north of Carmi and about four miles southwest of the area described above, the National Associated Petroleum Company reported six oil wells completed. Five of the wells were completed in the Aux Vases, and one was a dual completion in the Aux Vases and Ohara. Initial potentials ranged from 37 to 387 barrels of oil a day and averaged 150 barrels a day.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2N., R. 1-3 W.).

Maps 20, 21, 22, and 23 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

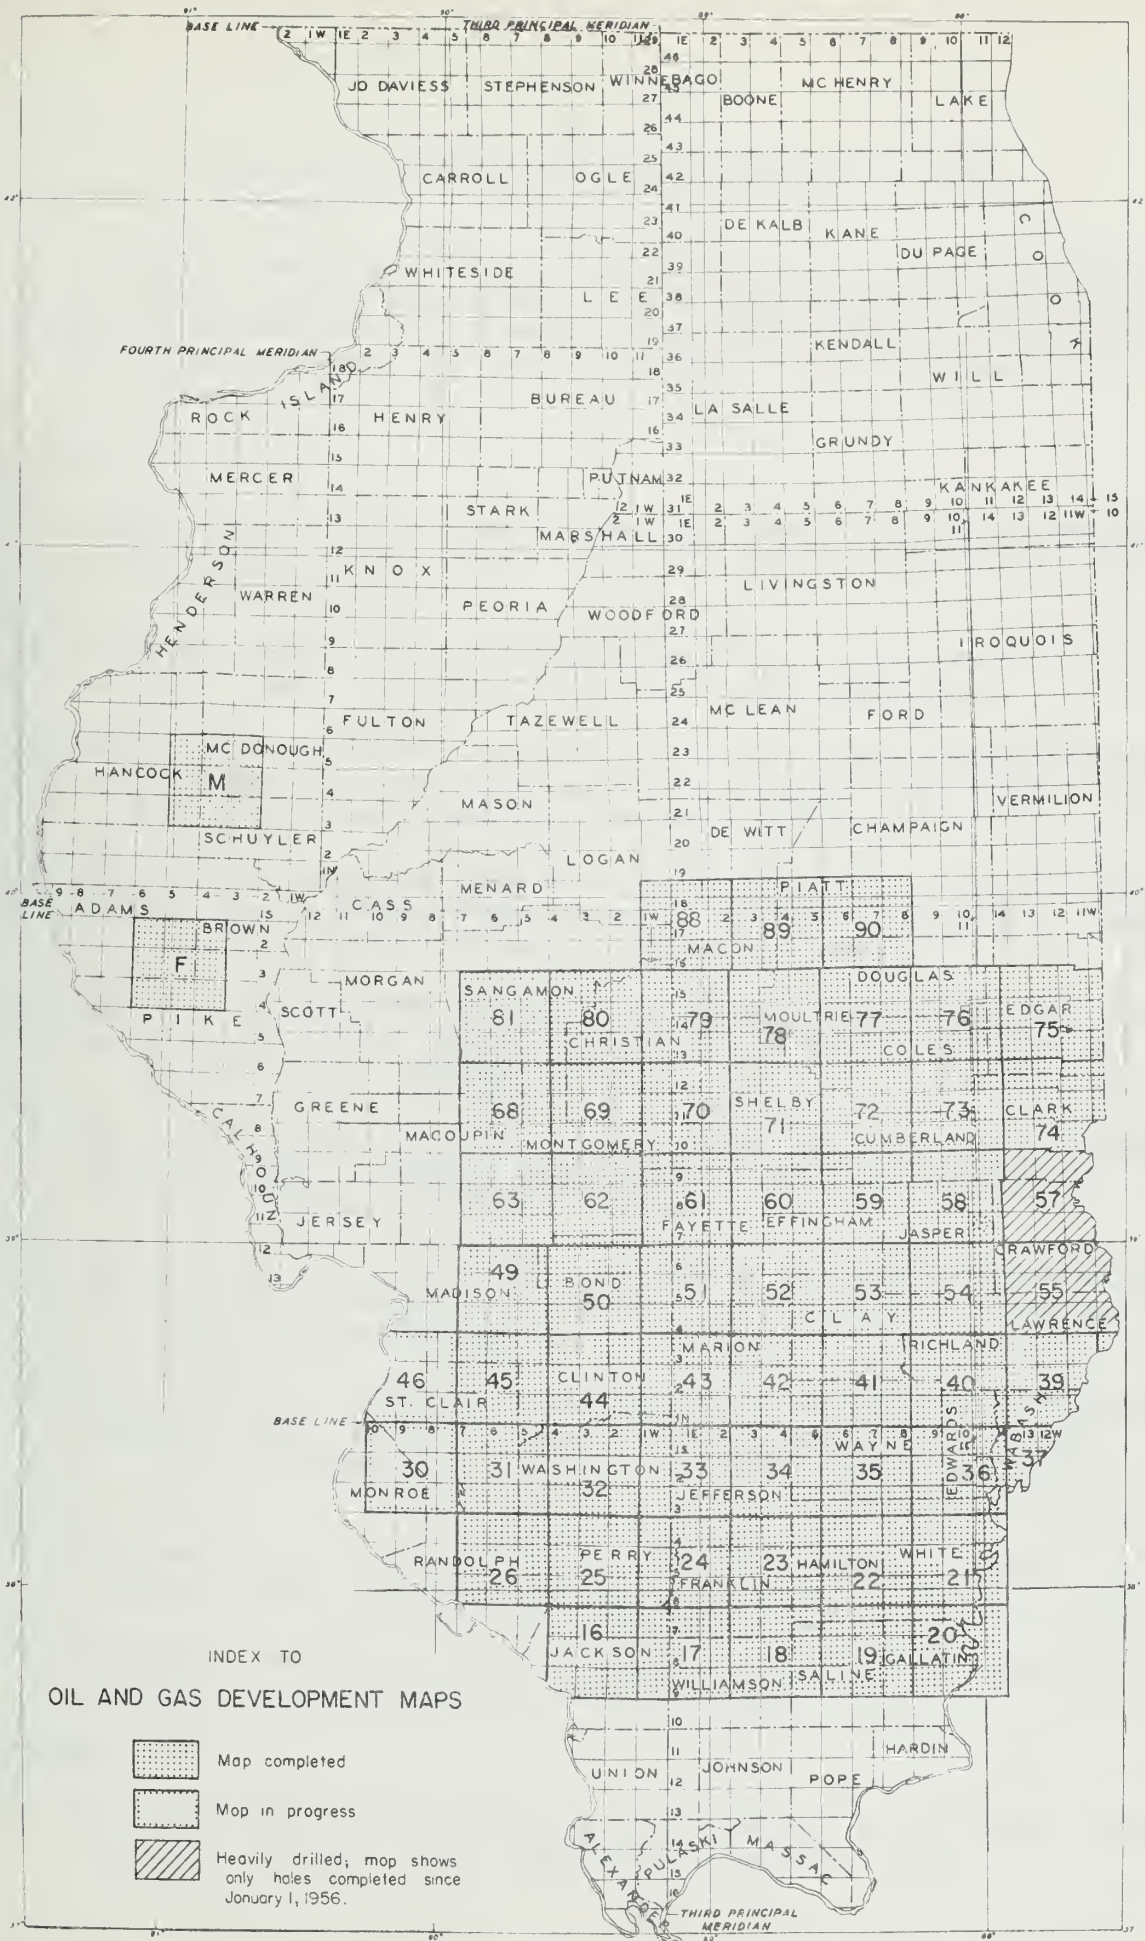

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

## OTHER OIL AND GAS MAPS

Map of the Oil and Gas Industry in Illinois. January 1, 1955. Scale approximately 8 miles to the inch. Shows location of oil and gas fields, pipelines, pumping stations and refineries. Available rolled (35¢) or included in Ill. Pet. 74, which includes alphabetical list of oil and gas pools and brief text (35¢). Map is presently being revised but is still available as above.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN MARCH 30 AND MAY 3, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and with secondary recovery projects, gas storage, or structure testing.

### News

Ray F. Starr completed another good Silurian lime well in Kellerville pool in Adams County. His #3-A Mildred Milliron in 12-2S-5W was drilled to a total depth of 653'. Initial production was 115 BOP a day. Top of the Silurian lime was at 622' with the pay zone from 632' to 641'. In the same section, Anchor Production Company completed its #4 Snow for 40 BOP from the Silurian lime.

In Eldorado Consolidated pool in Saline County, Louis Kapp drilled the #2 Wayne Sutton Community, 16-8S-7E, to total depth of 2921' and completed it for 290 BO a day flowing through 1/8" choke, from the Aux Vases sand, topped at 2888'. Three other oil wells and two gas wells also have been completed in this immediate area recently.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats, over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal.

#### OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6W.), and RUSHVILLE (T. 1S., 1-2N., R. 1-3W.).

Maps 20, 21, 22, and 23 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

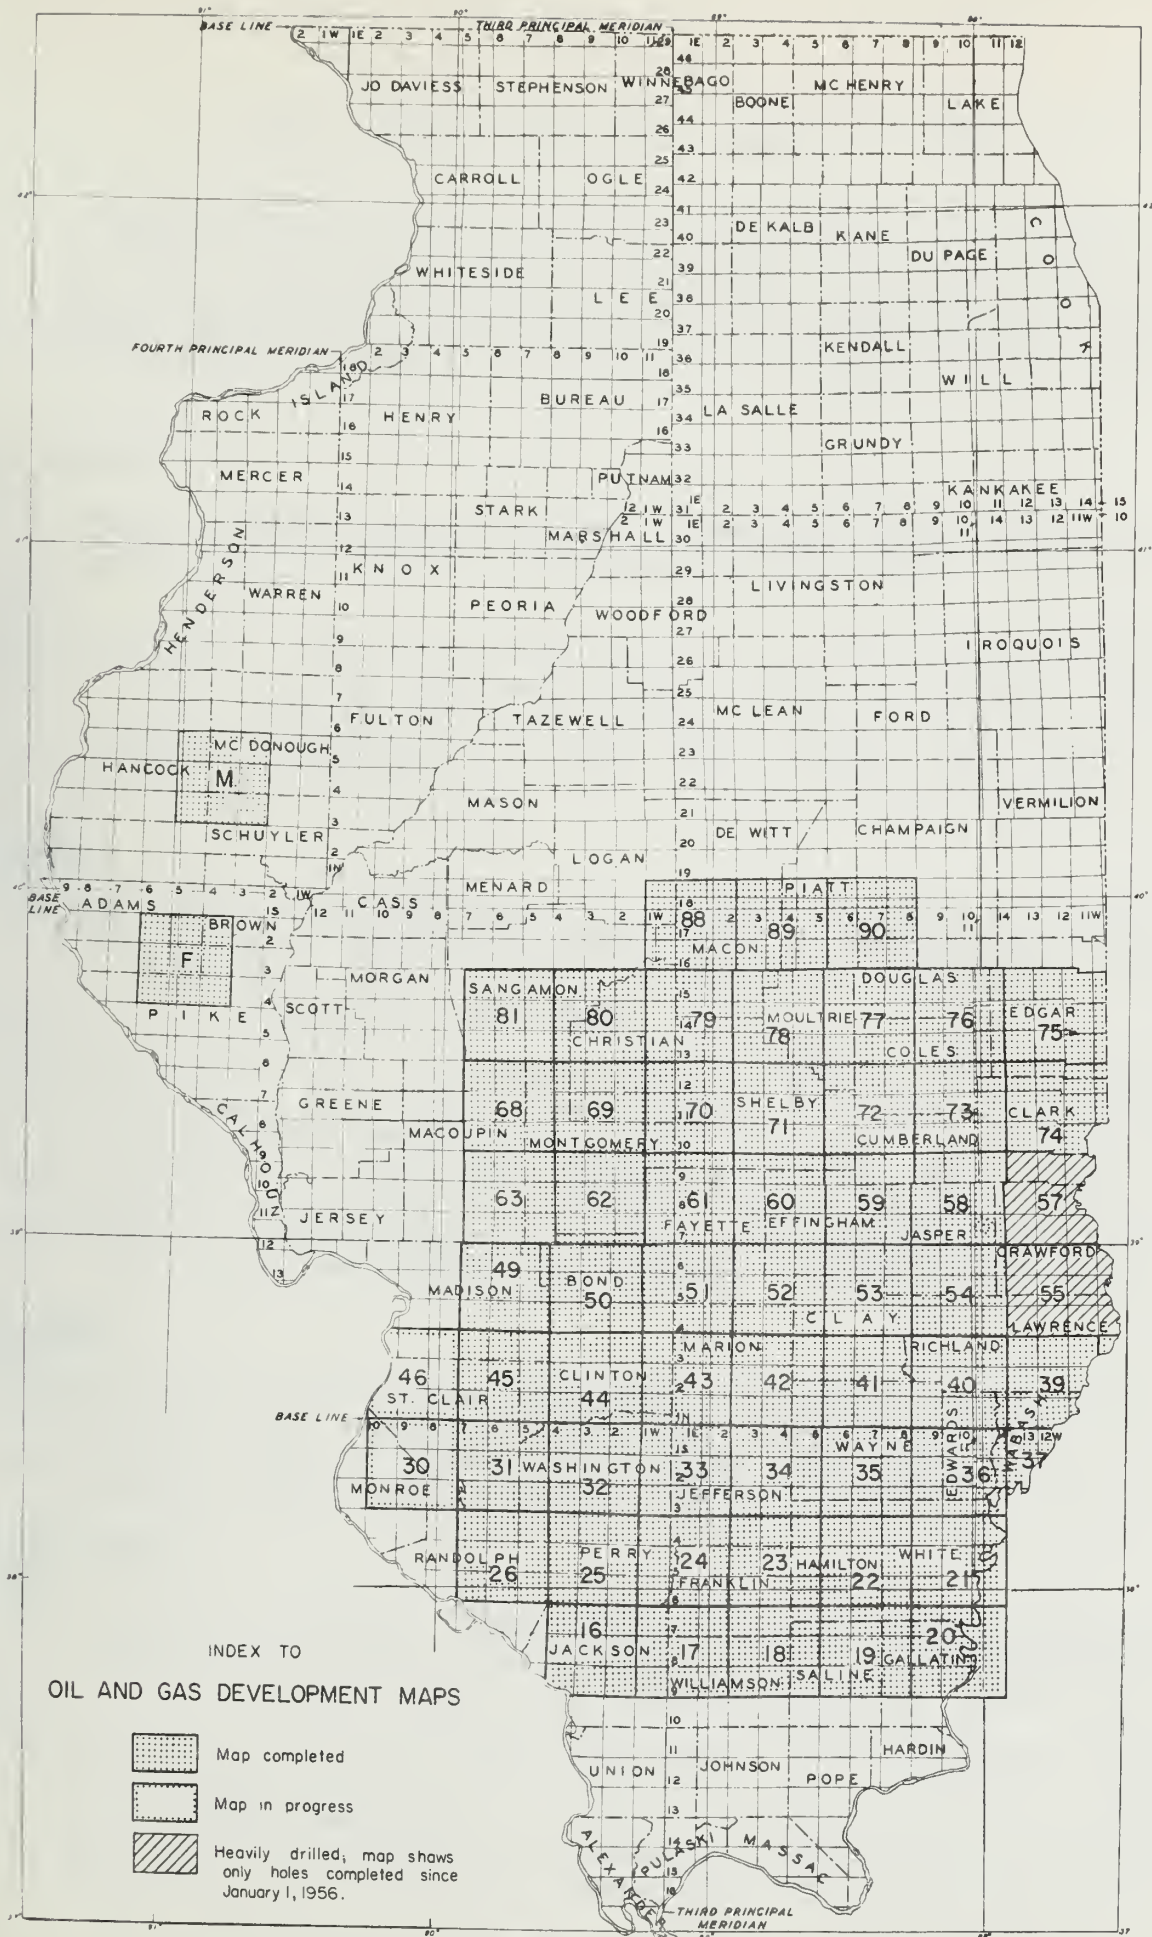

#### OTHER OIL AND GAS MAPS

Map of the Oil and Gas Industry in Illinois. January 1, 1955. Scale approximately 8 miles to the inch. Shows location of oil and gas fields, pipelines, pumping stations and refineries. Available rolled (35¢) or included in Ill. Pet. 74, which includes alphabetical list of oil and gas pools and brief text (35¢). Map is presently being revised but is still available as above.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

INDEX TO  
OIL AND GAS DEVELOPMENT MAPS

-  Map completed
-  Map in progress
-  Heavily drilled; map shows only holes completed since January 1, 1956.

## WELLS COMPLETED BETWEEN MAY 4 AND MAY 31, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage, or non-confidential structure tests.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats, over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal.

#### OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6W.), and RUSHVILLE (T. 1 S., 1-2N., R. 1-3W.).

Maps 20, 21, 22, 23, and 37 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

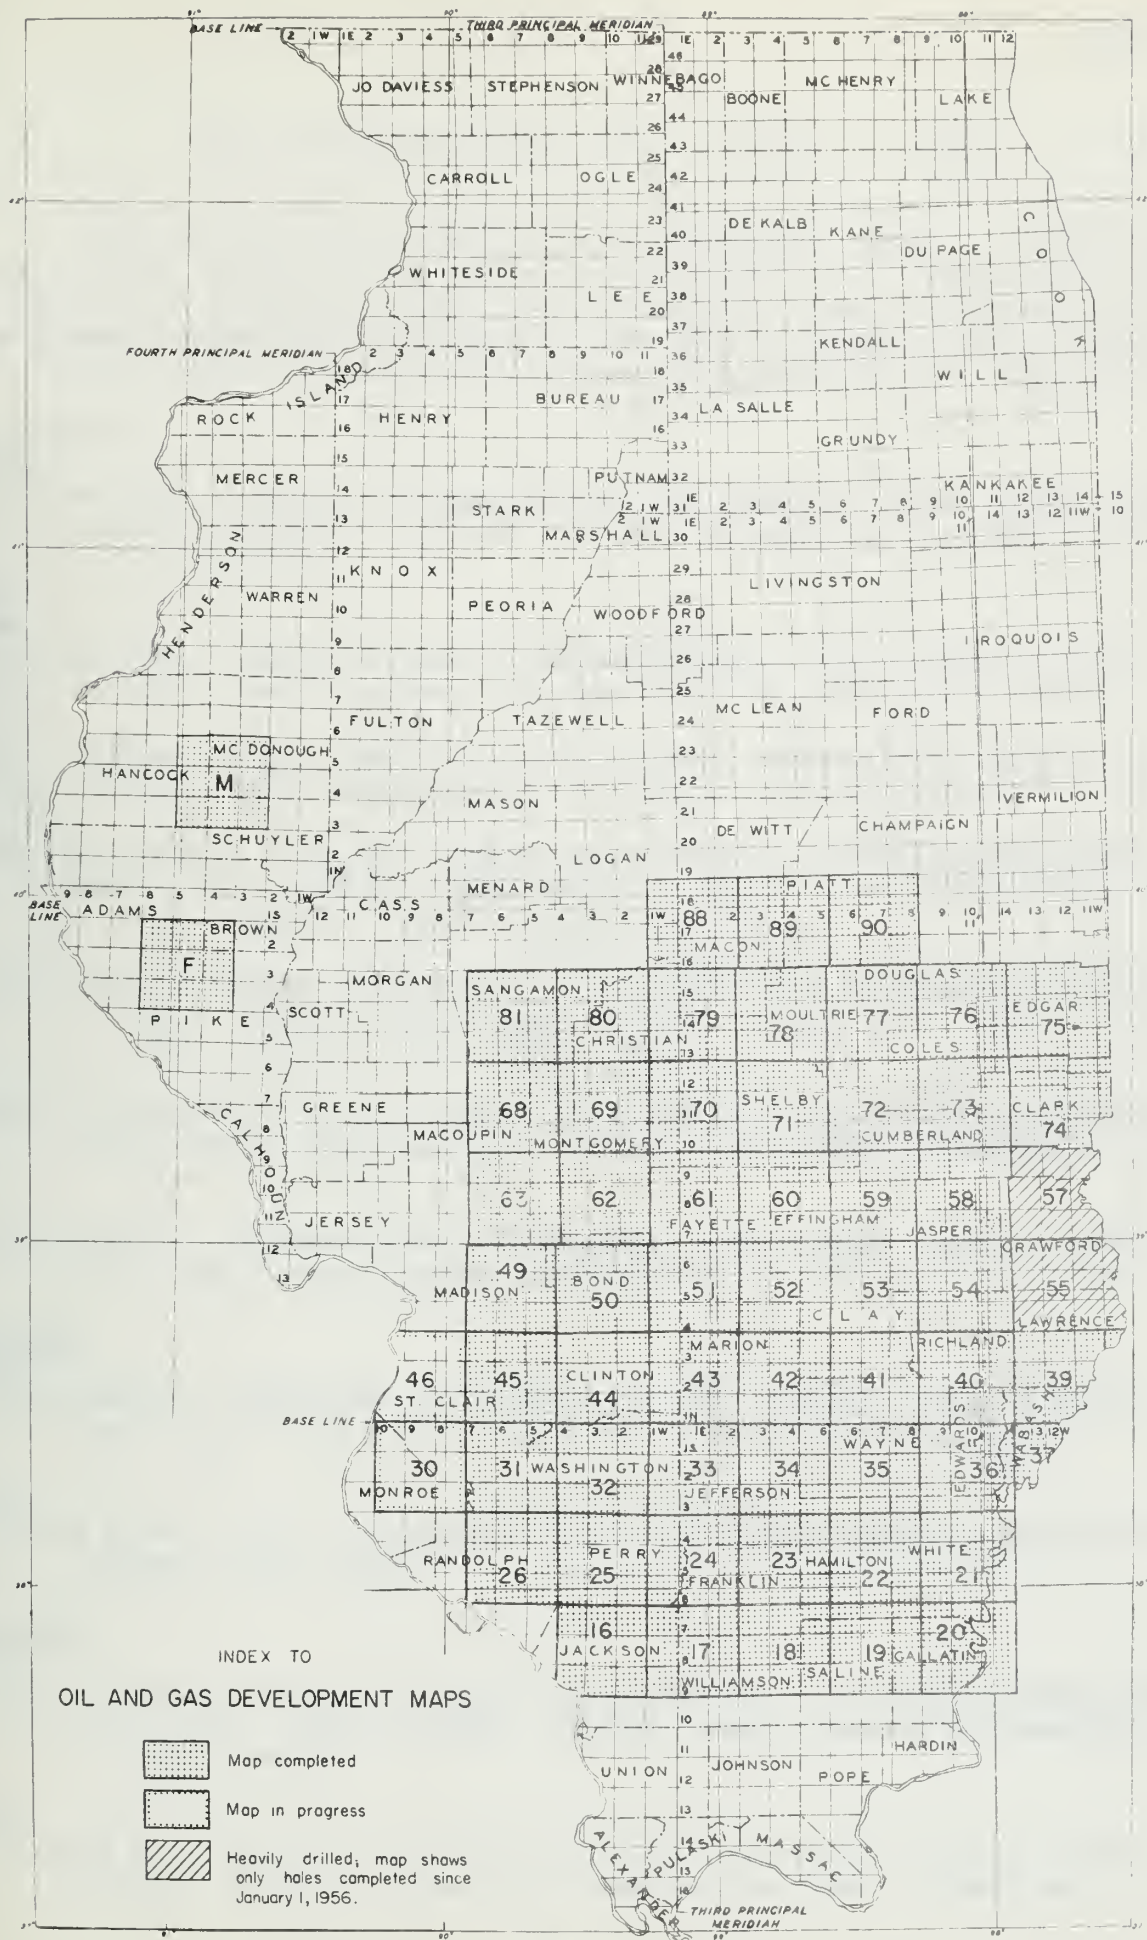

#### OTHER OIL AND GAS MAPS

Map of the Oil and Gas Industry in Illinois. January 1, 1955. Scale approximately 8 miles to the inch. Shows location of oil and gas fields, pipelines, pumping stations and refineries. Available rolled (35¢) or included in Ill. Pet. 74, which includes alphabetical list of oil and gas pools and brief text (35¢). Map is presently being revised but is still available as above.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN JUNE 1 AND JUNE 28, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage, or non-confidential structure tests.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats, over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2 N., R. 1-3 W.).

Maps 20, 21, 22, 23, and 37 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55 ) and Robinson (No. 57) maps now include pool names and pool boundaries.

## OTHER OIL AND GAS MAPS

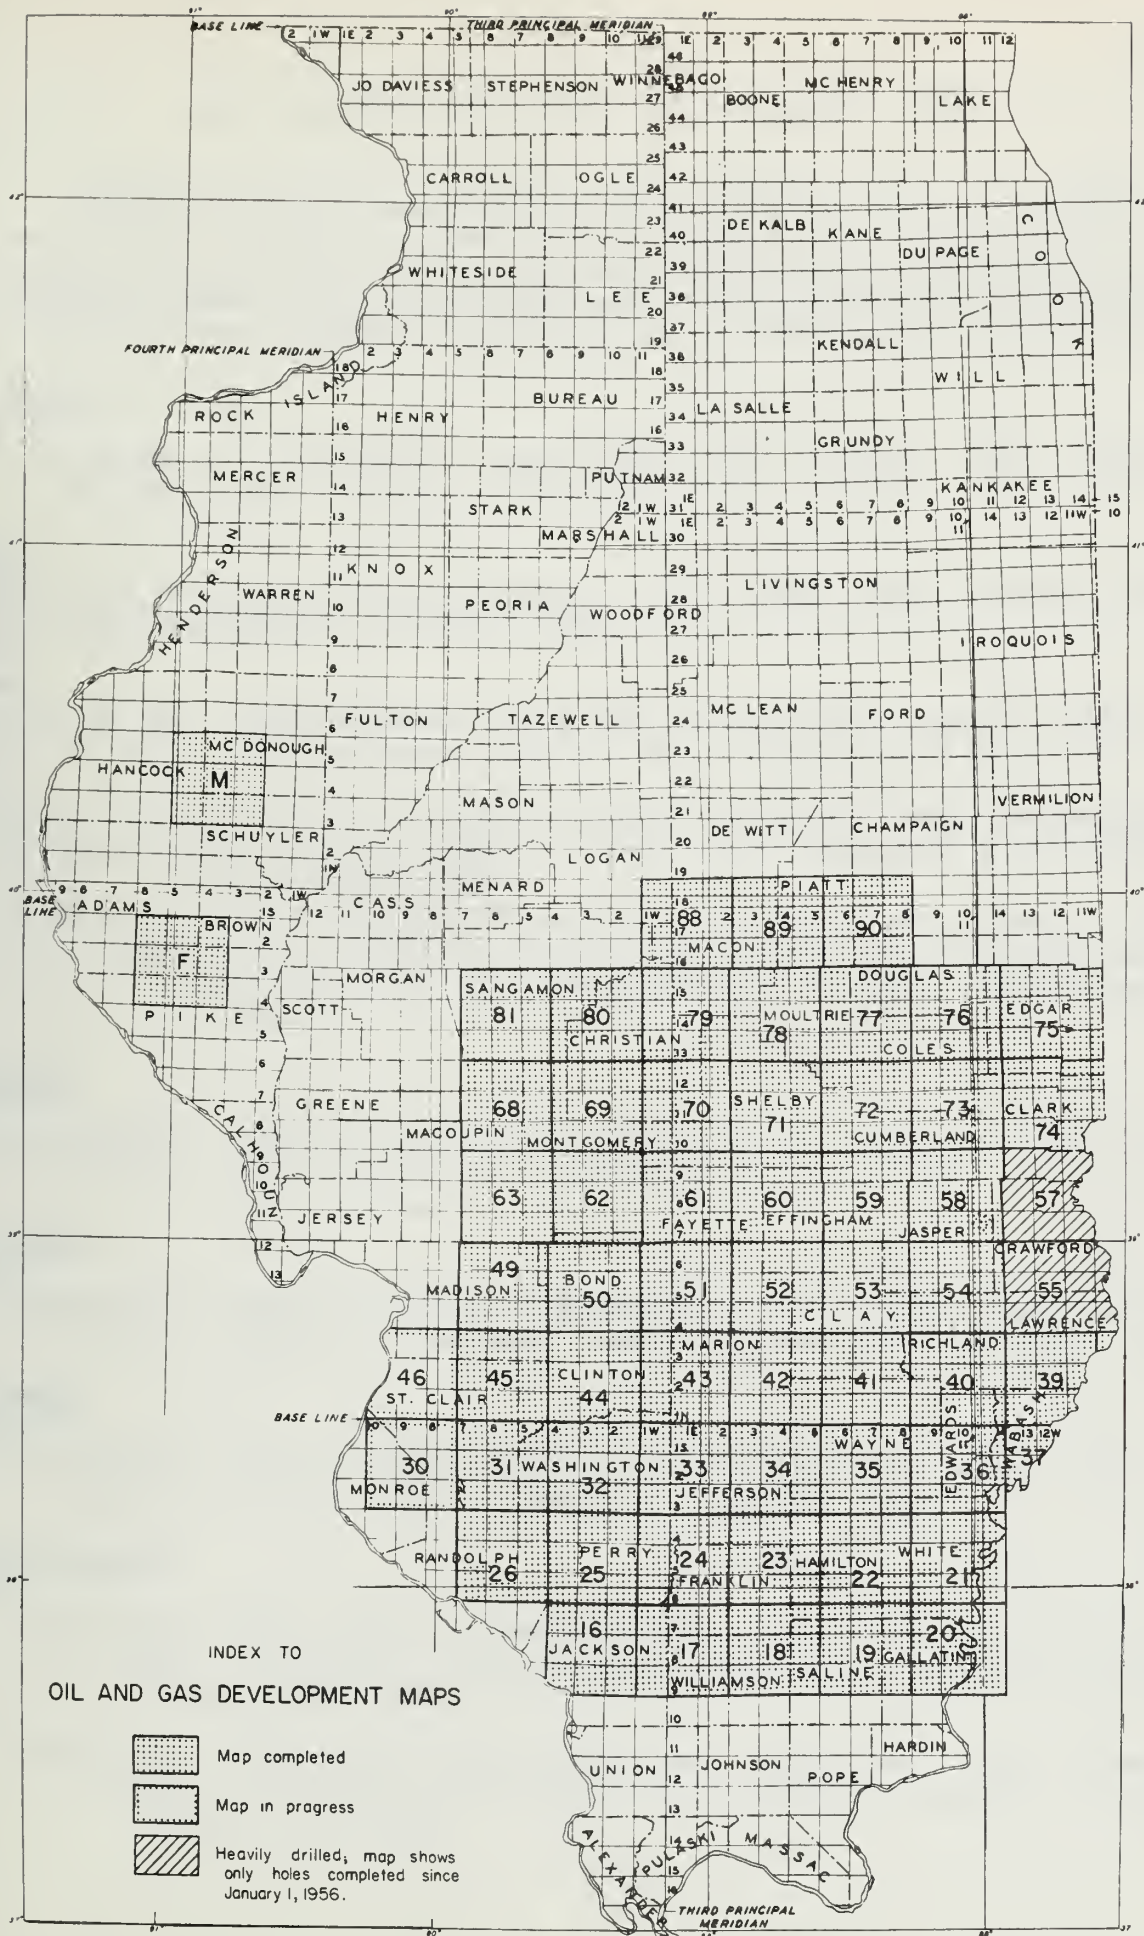

Oil and Gas Industry Map of Illinois. New edition, revised to January 1, 1961; scale 8 miles to one inch, showing oil and gas fields (producing and abandoned); crude, refined products, and natural gas pipelines; pumping, compressor, and metering stations; refineries; propane and gas storage; and underground gas storage projects, both existing and proposed. Single copies of this map may be secured free of charge, except for postage, by any resident and/or taxpayer in Illinois until September 1, 1961.

Price, 50¢ (see above)	Postage folded, 7½¢
	Rolled in tube, 21¢

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN JUNE 29 AND AUGUST 2, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage or non-confidential structure tests.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats, over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2 N., R. 1-3 W.).

Maps 20, 21, 22, 23, and 37 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

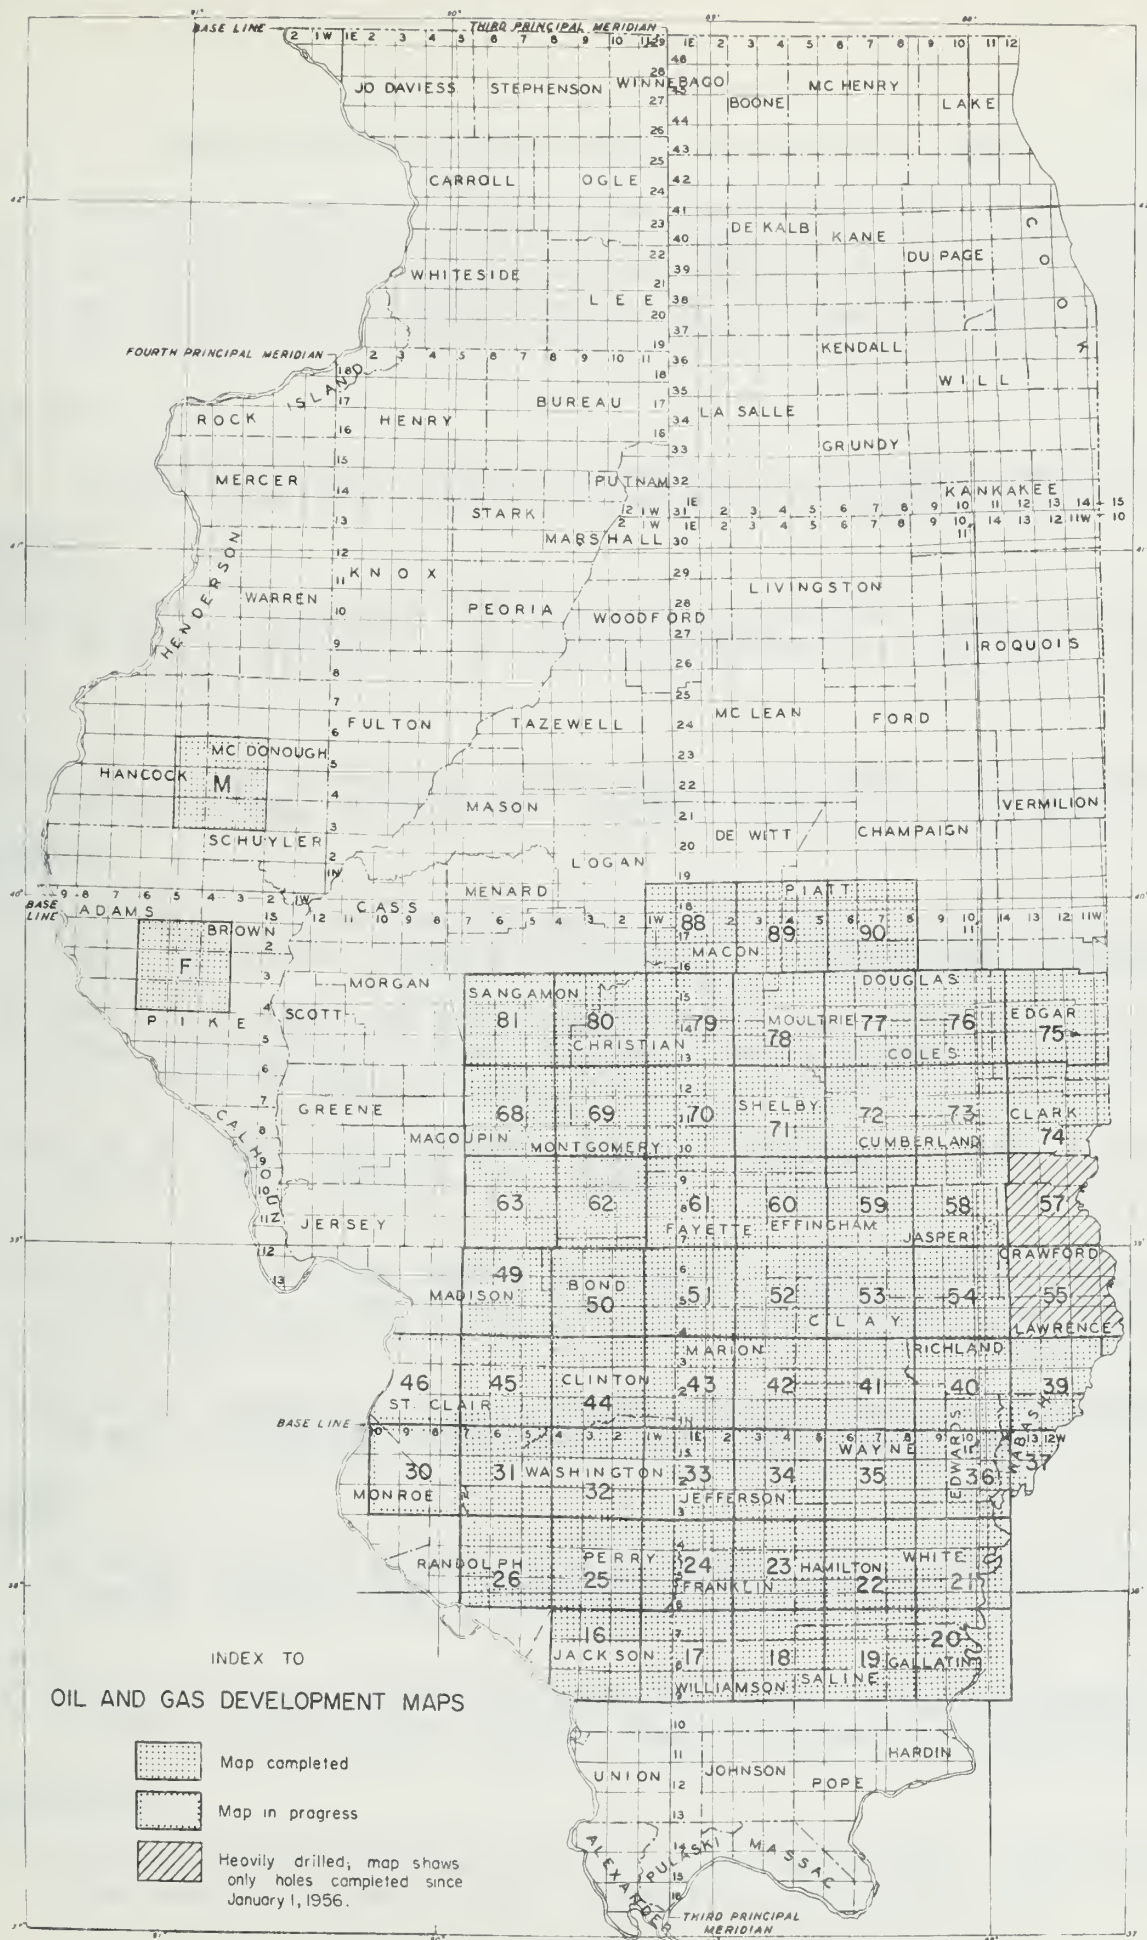

## OTHER OIL AND GAS MAPS

Oil and Gas Industry Map of Illinois. New edition, revised to January 1, 1961; scale 8 miles to one inch, showing oil and gas fields (producing and abandoned); crude, refined products, and natural gas pipelines; pumping, compressor, and metering stations; refineries; propane and gas storage; and underground gas storage projects, both existing and proposed. Single copies of this map may be secured free of charge, except for postage, by any resident and/or taxpayer in Illinois until September 1, 1961.

Price, 50¢ (see above) . . . . . Postage folded, 7½¢  
Rolled in tube, 21¢

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN AUGUST 3 AND AUGUST 30, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage or non-confidential structure tests.

### New Pay Zones in Pools

COIL WEST, Jefferson County, Salem lime at 3230' becomes the fifth pay in the pool, discovered by M. D. Burkett Oil Prop. #1 Ruth Holloway, 14-1S-4E, IP 14 BOP - 14 BW, after acid.

JOHNSON SOUTH, Clark County, Aux Vases sand at 716' becomes the fifth pay in the pool, discovered by Baughman-Osborn-Carrier #1 Sellars-Arrowhead, 35-9N-14W, IP 11 BOP, after frac.

WILBERTON, Fayette County, Carper sand at 3203' becomes the second pay in the pool, discovered by W. L. Beiden #2 Gehle, 13-5N-2E, IP 66 BOP - est. 20 BW, natural.

### DEEP WELLS

WAYNE COUNTY. A mile east of Sims, in Covington South pool, Peake Petroleum Company drilled their #1 Hanson, C NE NW, 14-2S-6E, to a total depth of 5280'. Fine-inch casing was set at 4304' and perforated opposite the Warsaw lime which tested water. The Warsaw was topped at 4152'. Perforations were squeezed off and the well put on the pump. After pump testing 5 barrels of oil and 500 barrels of water in 24 hours from Dutch Creek sand, topped at 5273', the well was temporarily abandoned.

Near the above well, in the C SW SW, 14-2S-6E, the #1 Kisemer was completed for an initial production of 34 barrels of oil a day from Harrodsburg lime, after frac. Total depth of the well is 4,174'. Harrodsburg was topped at 4139'.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats, over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last three months which are preliminary estimates compiled from the Oil and Gas Journal.

## WELL SAMPLE LIBRARY

A listing of current monthly additions to the well sample library at the Geological Survey is available, at no charge, upon request.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2 N., R. 1-3 W.).

Maps 20, 21, 22, 23, and 37 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

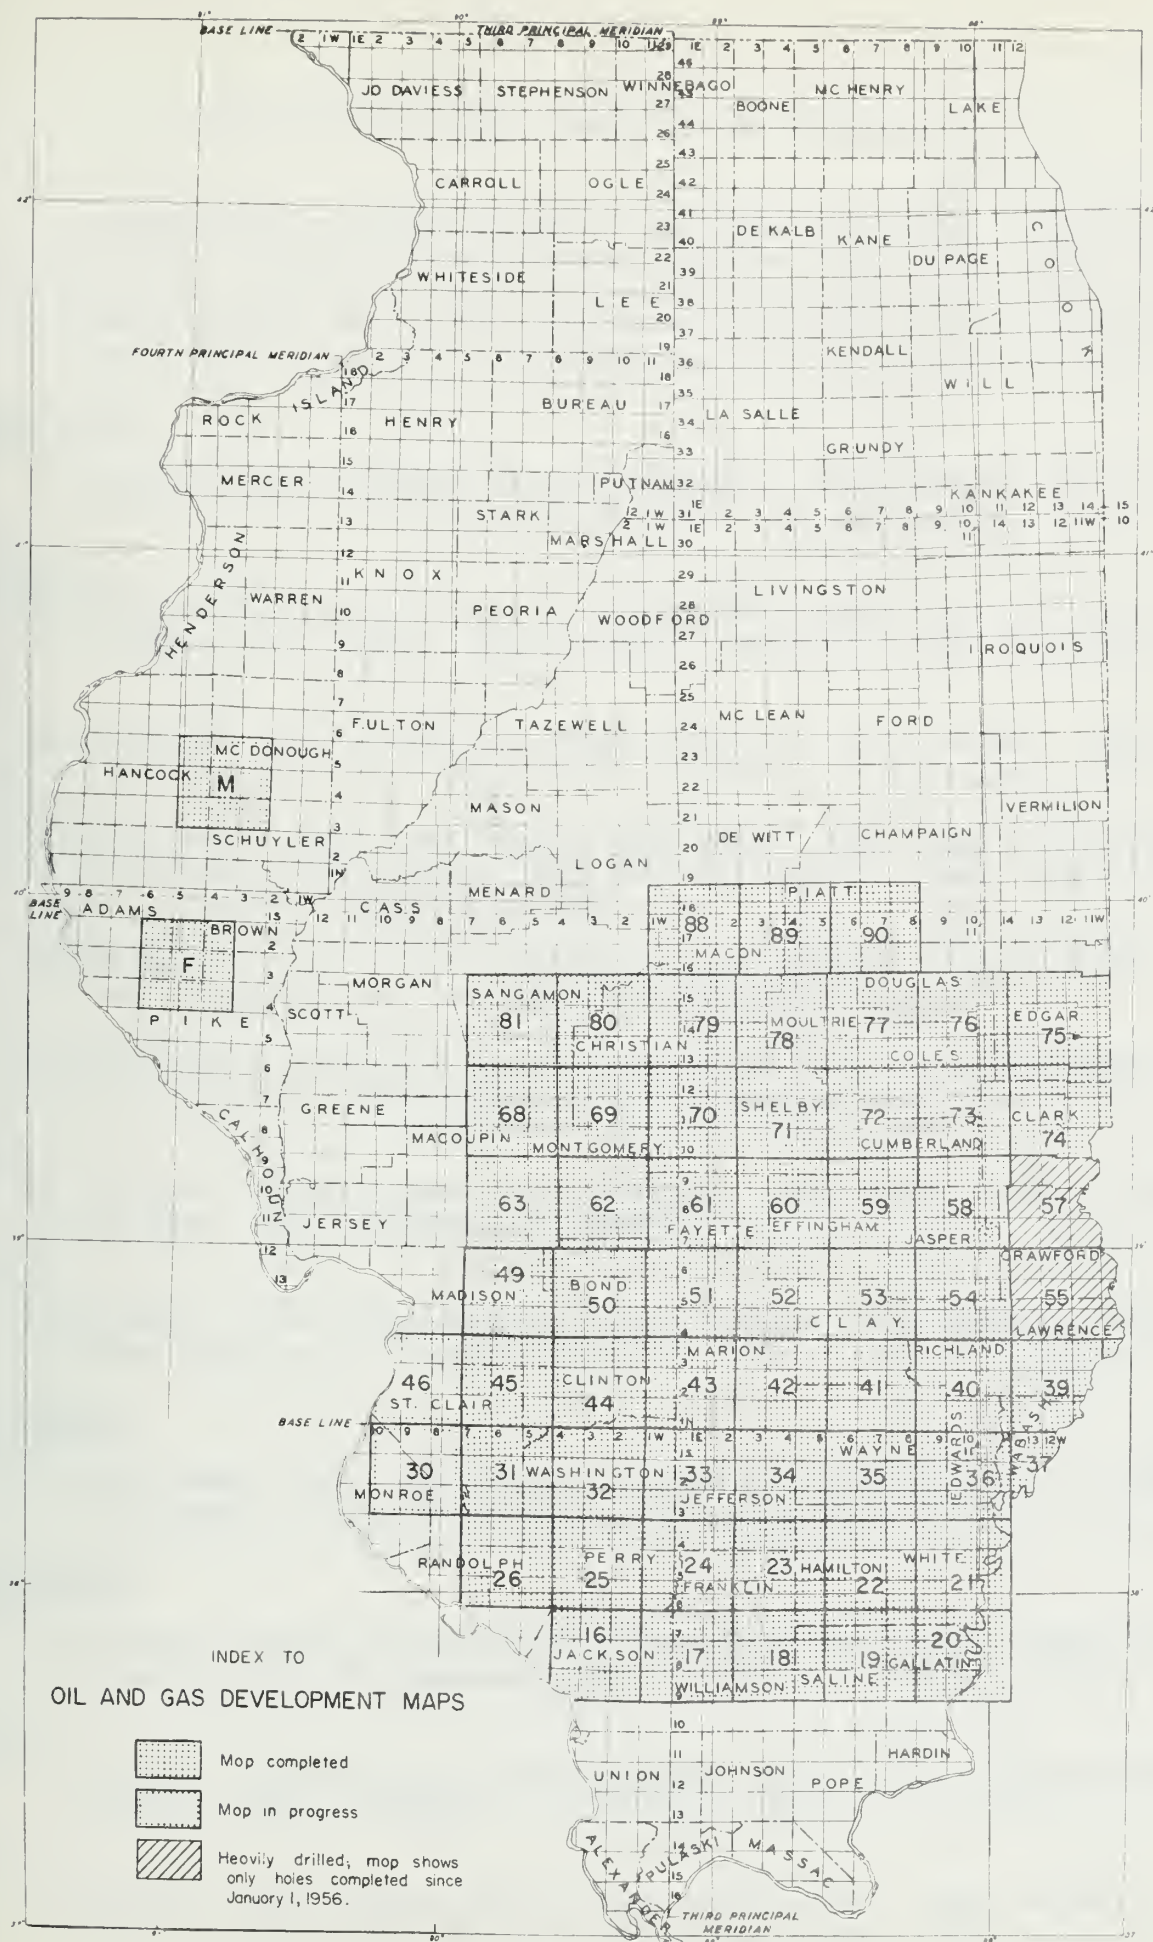

## OTHER OIL AND GAS MAPS

Oil and Gas Industry Map of Illinois. New edition, revised to January 1, 1961; scale 8 miles to one inch, showing oil and gas fields (producing and abandoned); crude, refined products, and natural gas pipelines; pumping, compressor, and metering stations; refineries; propane and gas storage; and underground gas storage projects, both existing and proposed. Single copies of this map may be secured free of charge, except for postage, by any resident and/or taxpayer in Illinois until September 1, 1961.

Price, 50¢ (see above) . . . . . Postage folded, 7½¢  
Rolled in tube, 21¢

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN AUGUST 31 AND SEPTEMBER 27, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage or non-confidential structure tests.

## TWENTY-FOUR YEARS OF COOPERATIVE OIL SCOUTING ENDS

Early in 1937, representatives of several oil companies met at Mattoon and established a cooperative oil reporting organization, which evolved into the Tri-State Oil Scouts Association. Since then the scouts have met weekly, each reporting current progress of all wells drilling within his assigned area. The well completions listed each month in this Drilling Report have been based on data recorded by the Survey scout who attended these meetings.

Participation in the scout check has varied with fluctuations in the activity in the Illinois Basin. Changing conditions in the industry have now made the cooperative organization for collecting information on oil well completions seem less attractive than commercial reporting of such data. The last check meeting of the Tri-State Oil Scouts Association was held October 11, 1961, and the organization disbanded. It has served the industry well in recording the activity of one of the nation's major oil regions.

Three commercial reporting services now serve this area. Listed alphabetically, these are Oil Well Information, Inc., P. O. Box 523, Olney, Illinois; Petroleum Information Corporation, 118 S. E. First Street, Evansville, Indiana, and P. O. Box 2612, Denver 1, Colorado; and Scout Check Incorporated, P. O. Box 4095, Evansville, Indiana. All three are staffed by competent personnel including former members of the Scouts Association. The Survey is cooperating with all three by sending them copies of certain types of public information that the Survey has collected. All three reporting services furnish data for this Drilling Report.

No period of transition is smooth. The proportion of wells actually completed in the field, but unrecorded, has understandably grown during the last few weeks of the Association's operations. These completions will be listed in this and subsequent numbers of the Drilling Report, some with the date of actual completion, some post-dated. We are sure that those who use this report will make allowances for any discrepancies.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to 2 miles from production and if successful are usually called extensions. Far wildcats, over two miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last two months which are preliminary estimates compiled from the Oil and Gas Journal.

## WELL SAMPLE LIBRARY

A listing of current monthly additions to the well sample library at the Geological Survey is available, at no charge, upon request.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2 N., R. 1-3 W.).

Maps 20, 21, 22, 23, and 37 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

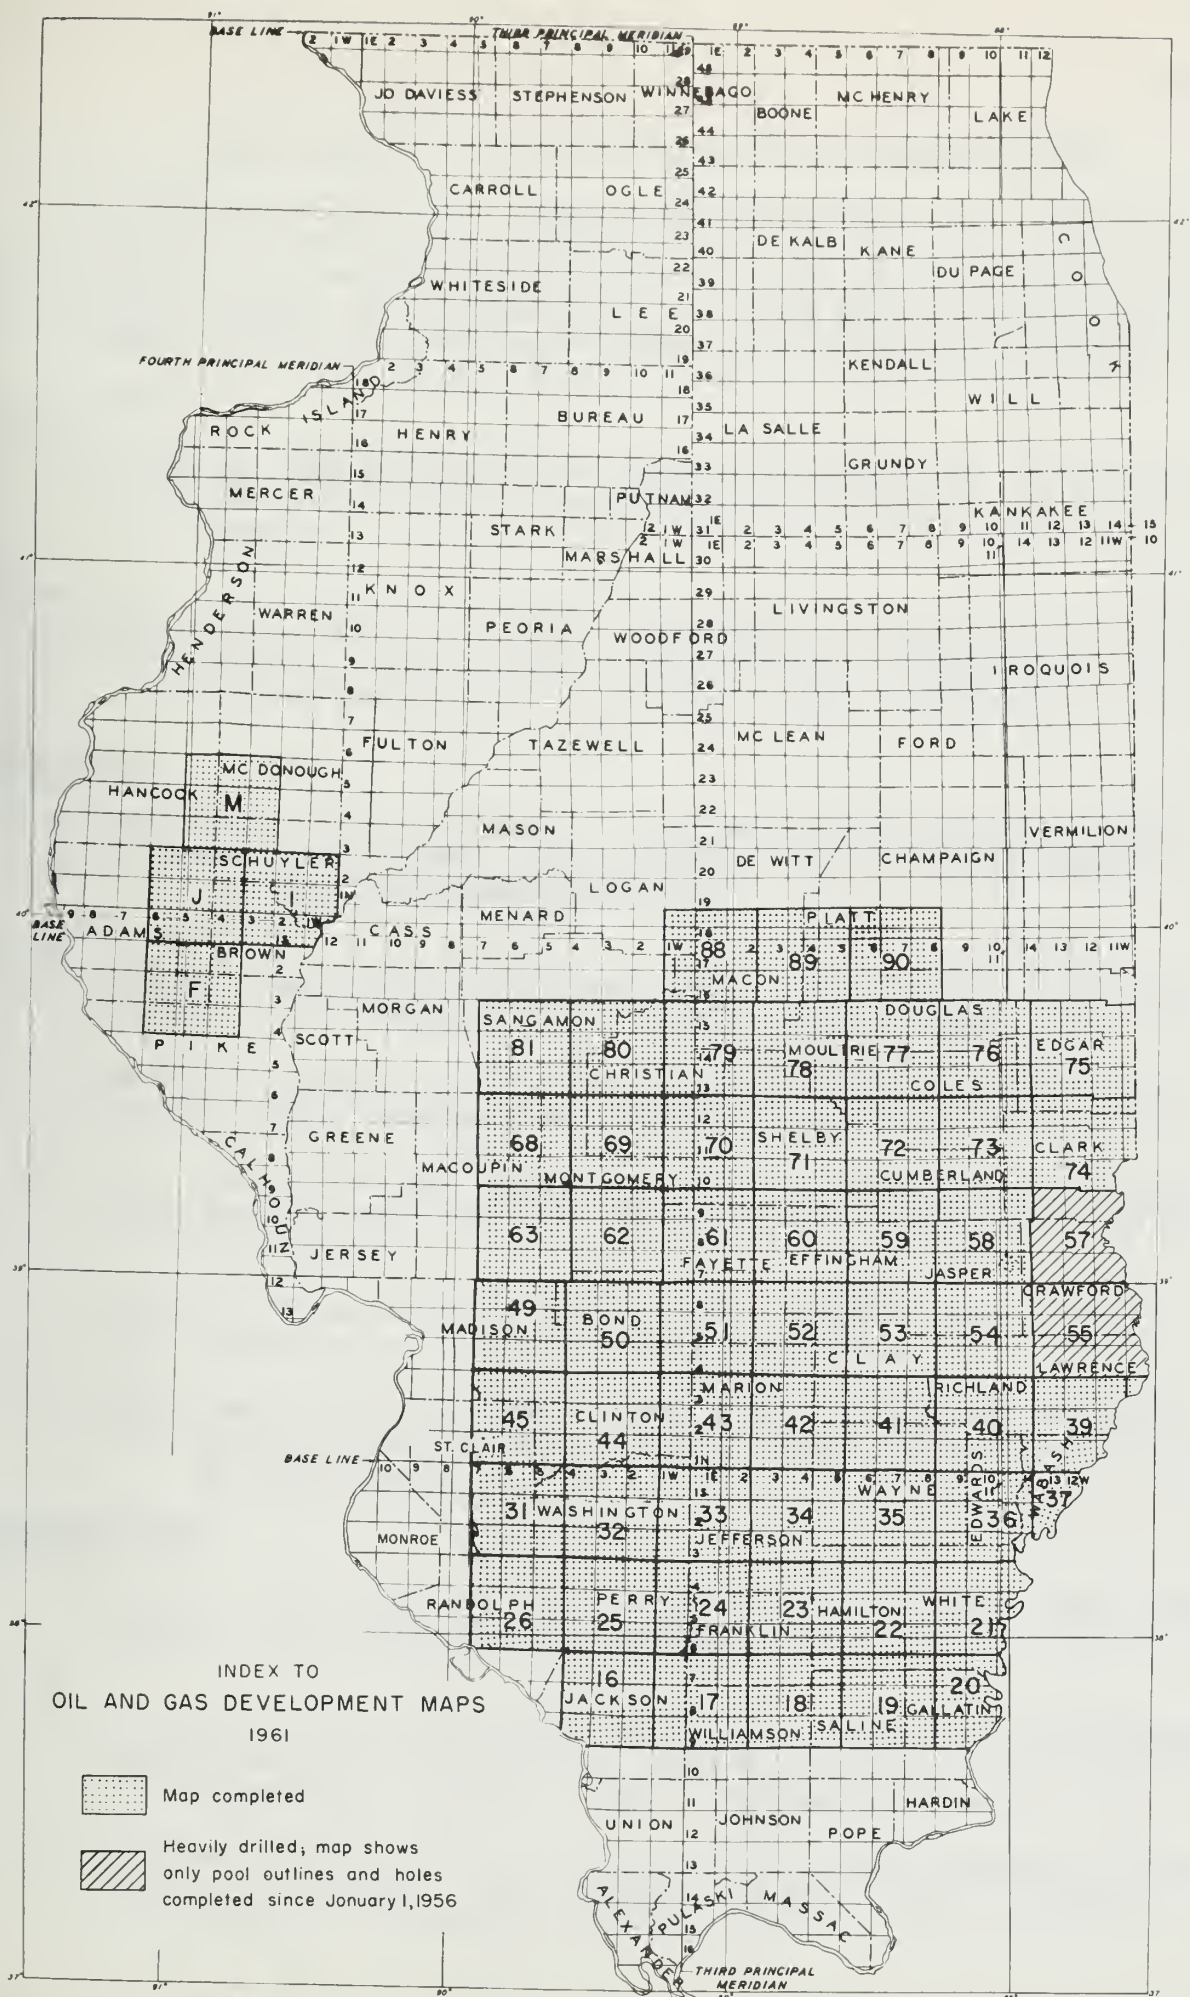

## OTHER OIL AND GAS MAPS

Oil and Gas Industry Map of Illinois. New edition, revised to January 1, 1961; scale 8 miles to one inch, showing oil and gas fields (producing and abandoned); crude, refined products, and natural gas pipelines; pumping, compressor, and metering stations; refineries; propane and gas storage; and underground gas storage projects, both existing and proposed. Price, 50¢.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN SEPTEMBER 28 and OCTOBER 27, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to 2 miles, and a wildcat far (WF) more than 2 miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage or non-confidential structure tests.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to  $1\frac{1}{2}$  miles from production and if successful are usually called extensions. Far wildcats, over  $1\frac{1}{2}$  miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Tri-State Oil Scouts Association Pipe Line Production Reports, except for the last three months which are preliminary estimates compiled from the Oil and Gas Journal.

## WELL SAMPLE LIBRARY

A listing of current monthly additions to the well sample library at the Geological Survey is available, at no charge, upon request.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile. In addition to the maps shown on the opposite index, two new unnumbered development maps are available for areas in Adams, Brown, and Schuyler Counties, western Illinois, CLAYTON (T. 1 S., 1-2 N., R. 4-6 W.), and RUSHVILLE (T. 1 S., 1-2 N., R. 1-3 W.).

Maps 20, 21, 22, 23, and 37 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

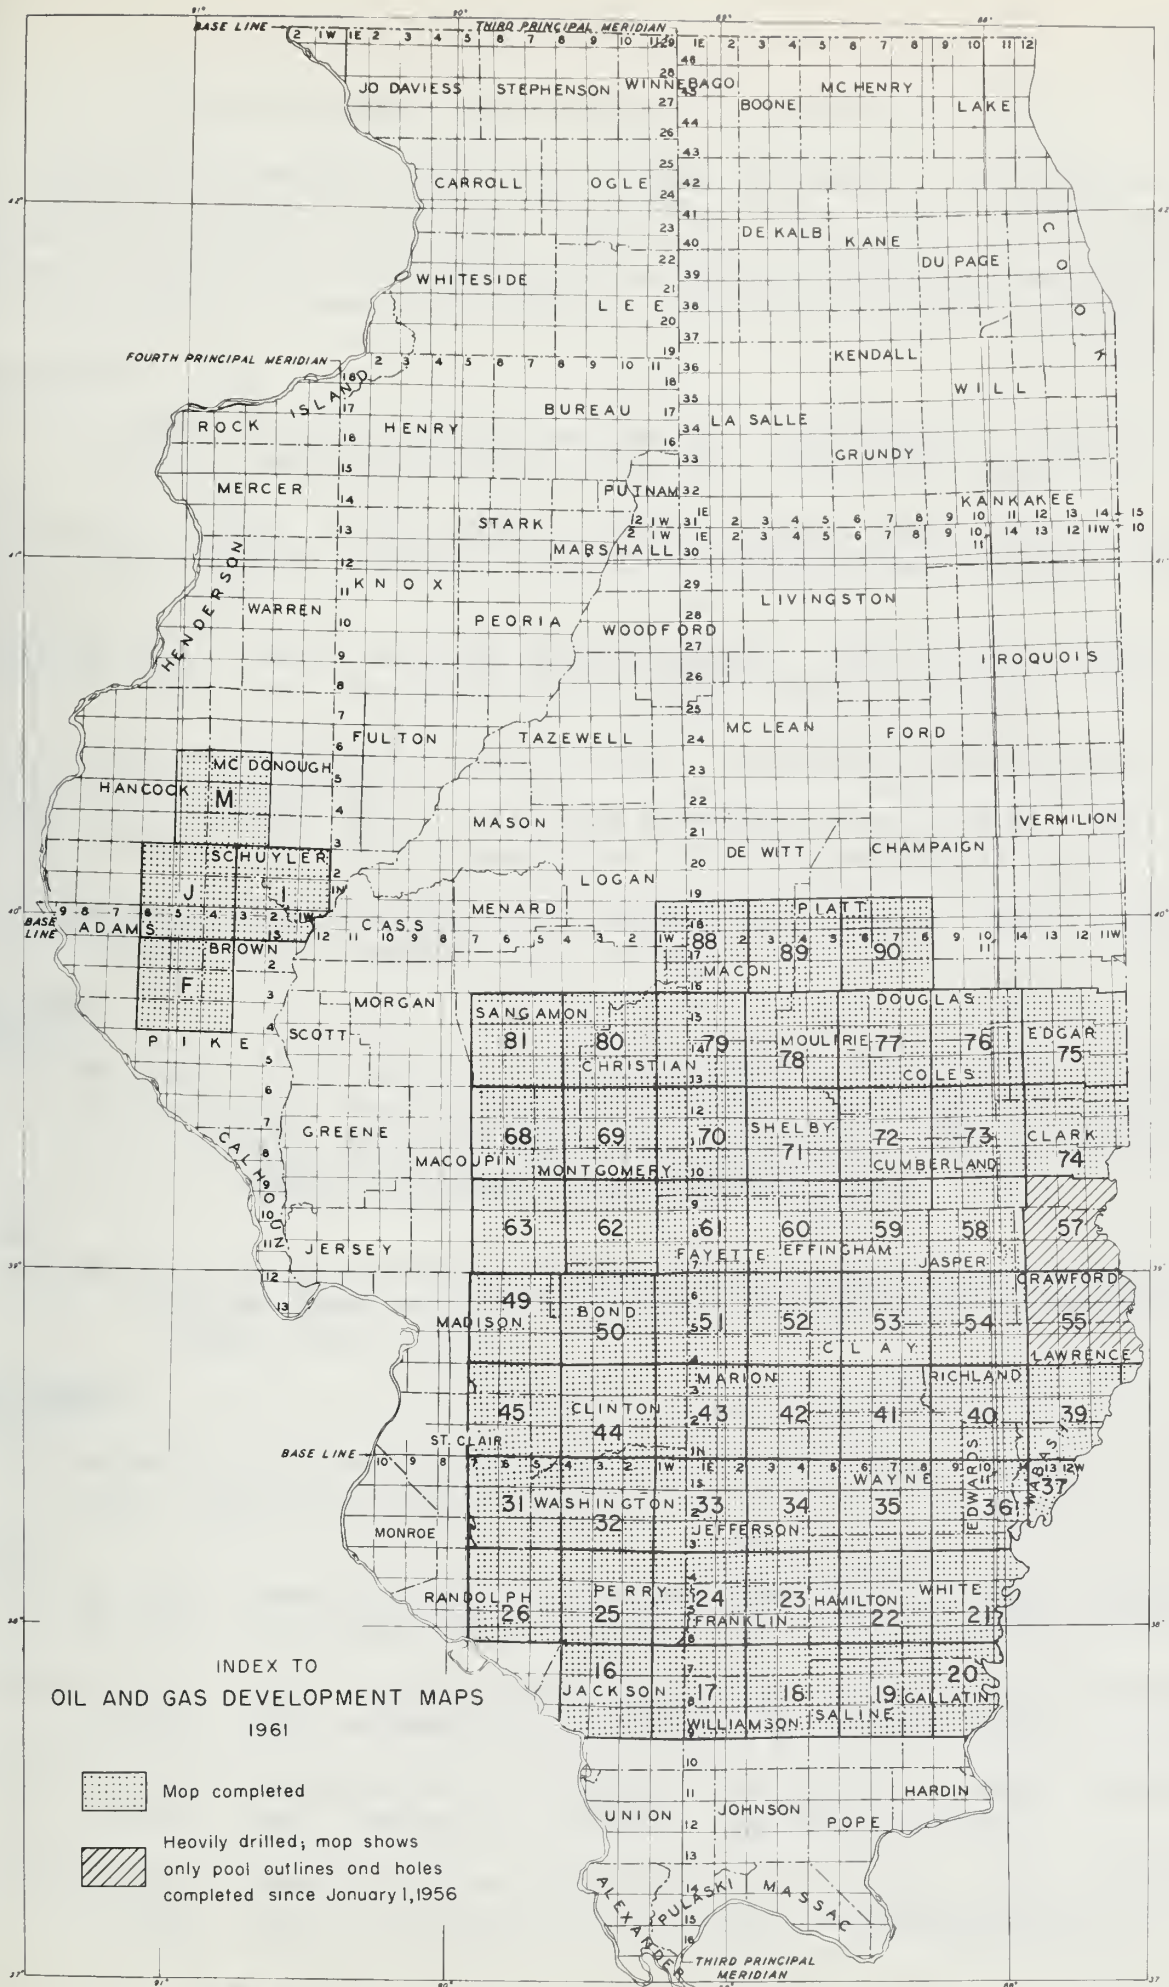

## OTHER OIL AND GAS MAPS

Oil and Gas Industry Map of Illinois. New edition, revised to January 1, 1961; scale 8 miles to one inch, showing oil and gas fields (producing and abandoned); crude, refined products, and natural gas pipelines; pumping, compressor, and metering stations; refineries; propane and gas storage; and underground gas storage projects, both existing and proposed. Price, 50¢.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. Price, 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN OCTOBER 28 and NOVEMBER 29, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to  $1\frac{1}{2}$  miles, and a wildcat far (WF) more than  $1\frac{1}{2}$  miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage or non-confidential structure tests.

## DISCOVERIES

### Extensions to Oil Pools

EDINBURG WEST, Sangamon County, 6-14N-3W. F. A. Prill #1 W. Walker.

CORRECTION. This oil well was erroneously reported as an extension to Edinburg West pool in the November 1961 Drilling Report. It should have been called a pool well in Edinburg West pool.

EDINBURG WEST, Sangamon County, 1-14N-4W, Silurian lime. Discovery well, Atkins and Hale #1 Spicer, IP 22 BOP, 38 BW, after frac.

STRINGTOWN, Jasper County, 19-5N-11E, McClosky lime. Discovery well, John Barker #1 Howard Schilt, a former dry hole reworked, IP 24 BOP, trace of water, after acid.

### New Pay Zones in Pools

ST. JAMES, Fayette County, Carper sand at 3073' becomes the fifth pay in the pool, discovered by L. E. Ostrom #1-A Smail, 25-6N-2E, IP 130 BOP, 30 BW, natural.

### CONSOLIDATION OF POOLS

Recent oil well completions have bridged the gaps between Divide, Divide East, and Divide West pools in Jefferson County. These three pools have therefore been consolidated into one pool, to be called DIVIDE CONSOLIDATED.

Tests are considered pool wells if located less than  $\frac{1}{2}$  mile from producing well. Near wildcats are drilled  $\frac{1}{2}$  to  $1\frac{1}{2}$  miles from production and if successful are usually called extensions. Far wildcats, over  $1\frac{1}{2}$  miles from production, usually discover new pools if successful. Reworked wells listed in the body of the report are included in this table only if they are former dry holes converted to producing wells. Production figures are based on Pipe Line Production Reports, except for the last three months which are preliminary estimates compiled from the Oil and Gas Journal.

## OIL AND GAS DEVELOPMENT MAPS

Price, 60¢ each, except #37, which costs 40¢, available from the Illinois State Geological Survey, Natural Resources Building, Urbana, Illinois.

The maps (blue-line print maps, revised quarterly) show oil, gas, and dry and abandoned wells on a base noting towns, main roads, county, township and section lines. Scale two inches to the mile.

Maps 20, 21, 22, 23, 31, 37, 41, 53, 54, and 73 have been recently redrawn on new bases and show, in addition to information on the other maps, salt water disposal wells, conversions, water input wells, waterflood producers, and stratigraphic tests no longer confidential.

The Flat Rock (No. 55) and Robinson (No. 57) maps now include pool names and pool boundaries.

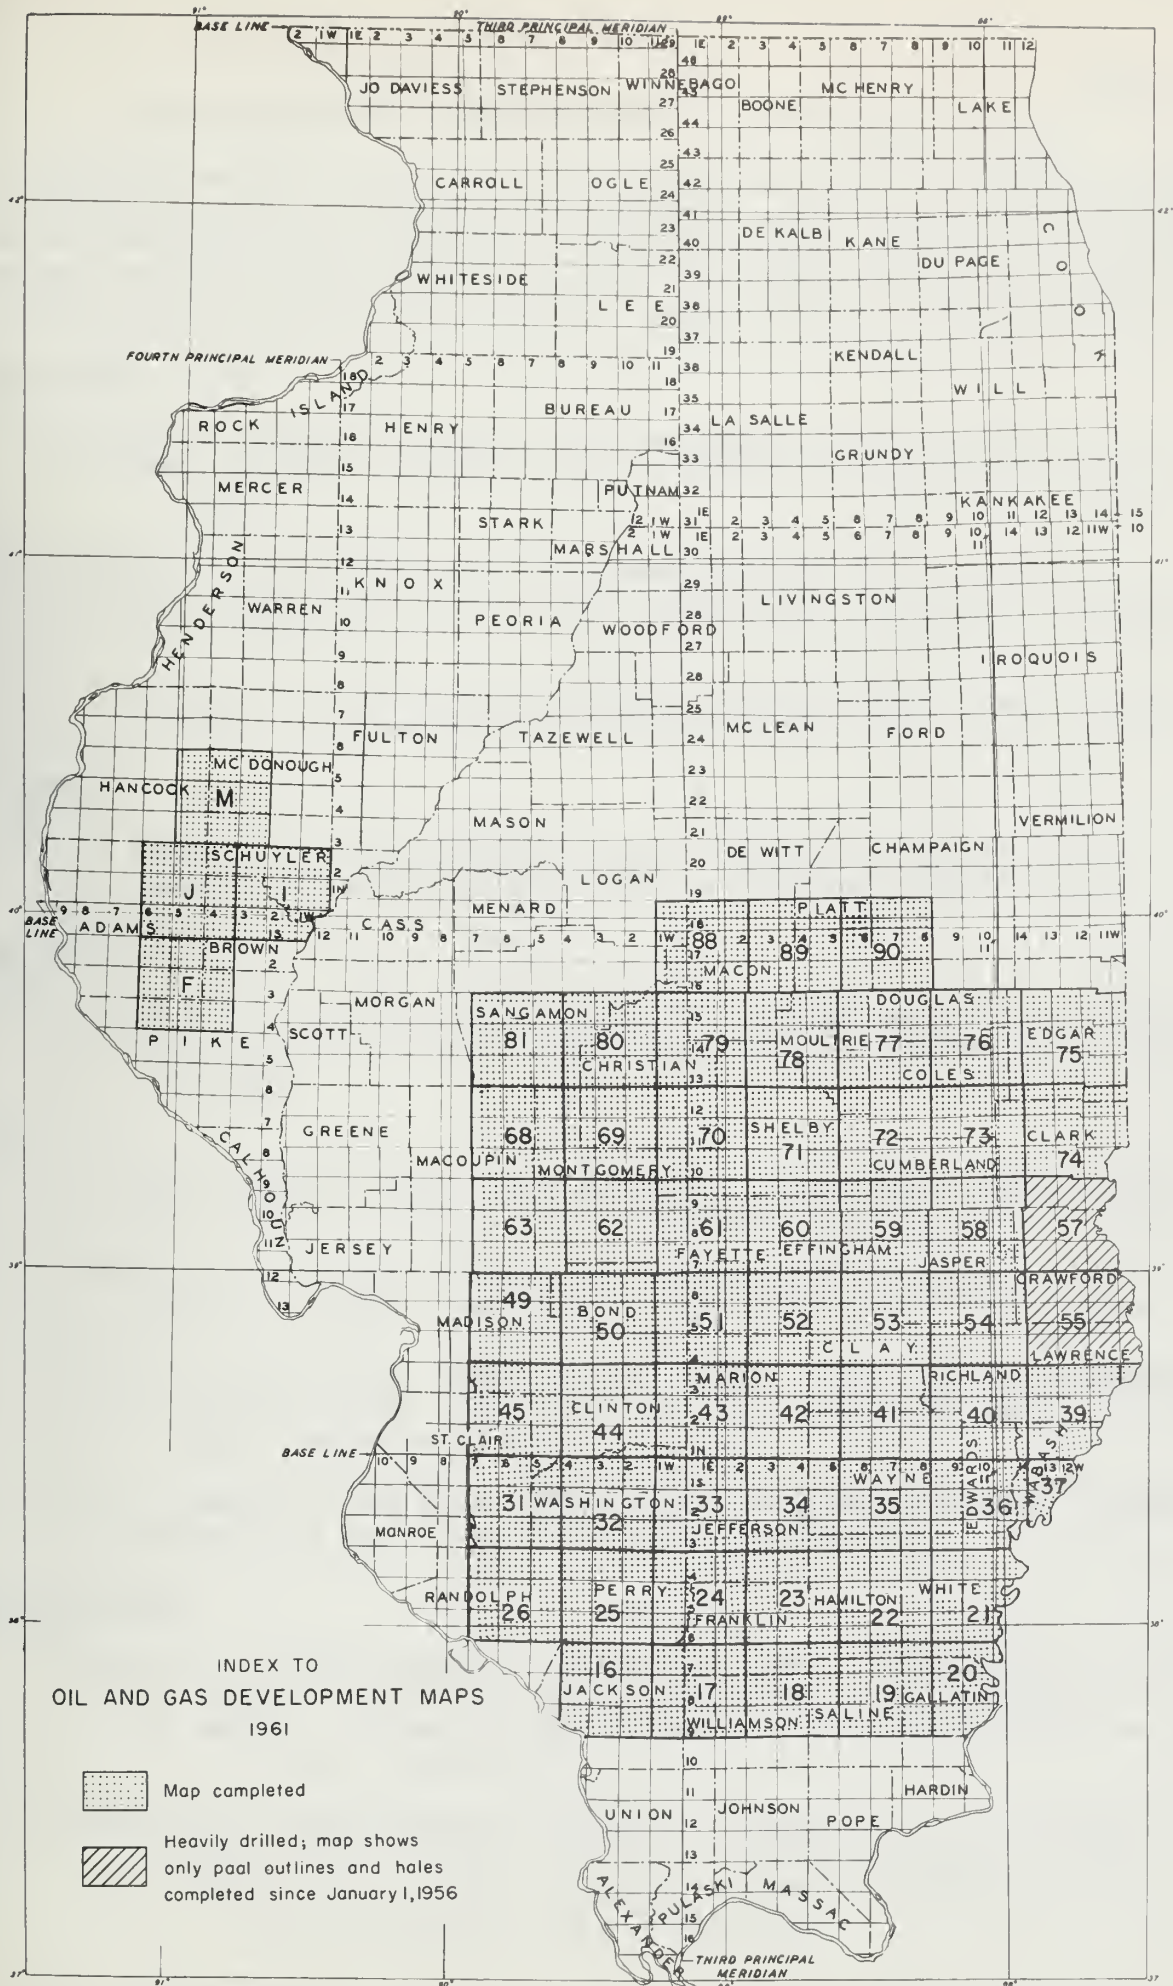

## OTHER OIL AND GAS MAPS

Oil and Gas Industry Map of Illinois. New edition, revised to January 1, 1961' scale 8 miles to one inch, showing oil and gas fields (producing and abandoned); crude, refined products, and natural gas pipelines; pumping, compressor, and metering stations; refineries; propane and gas storage; and underground gas storage projects, both existing and proposed. Price, 50¢.

Preliminary Structure Map of the "Trenton" in Illinois. January, 1954. Price, 30¢.

A list of these and other maps and publications is available on request from the Illinois State Geological Survey.

## WELLS COMPLETED BETWEEN NOVEMBER 30 and DECEMBER 20, 1961

Abbreviations used are listed on the inside back cover. A pool well is less than  $\frac{1}{2}$  mile, a wildcat near (WN) is  $\frac{1}{2}$  to  $1\frac{1}{2}$  miles, and a wildcat far (WF) more than  $1\frac{1}{2}$  miles from production. The report covers wells drilled to produce oil and gas by primary methods, but includes only part of the holes drilled in connection with secondary recovery projects, gas storage or non-confidential structure tests.
